

Rule ID	Category	Trigger Condition	Severity	SLA	Resolution Type	Owner
ER-01	Data Mismatch	Applicant name on application form does not match	High	4 business hours	Manual request corrected/ clarifying document	Credit Analyst
ER-02	Document Quality	Uploaded document is illegible, corrupted or incorrectly cropped	Low	24 hours	Auto request reupload	System
ER-03	Duplicate Application	Same applicant (matched by ID number) submits more than one active application	Medium	24 hours	Manual merge or clarify with customer	Operation Officer
ER-04	Field Validation Failure	ID number, phone or other structured field fails format validation	Low	Auto resolved at submit	Auto block submission with inline correction prompt	System
ER-05	Address Mismatch	Address on application differs from address on supporting document, no explanation provided	Medium	24 hours	Manual, request proof of current address	Credit Analyst
ER-06	Unresolved after reminder cycle	Document request (FR-08) remains outstanding after all scheduled reminders exhausted	Medium	Escalate at 120h(per FR-08)	Manual by Operations	Operations Officer
ER-07	Identity Verification Ambiguity	Photo ID is present but quality/clarity insufficient for confident visual verification	High	4 business hours	Manual request alternate ID or clearer image	Credit Analyst
ER-08	Applicant Reported Discrepancy	Customer contacts Support to dispute or correct information already submitted	Medium	24 hours	Manual; verify and update record with audit note	Operations Manager
ER-09	Uncategorized Manual Review	Reviewer flags an issue that doesn't match any defined rule(fallback per FR- 10)	Medium	24 hours	Manual; Operations Manager assigns category retroactively or escalates to define new rule	Operations Manager

Severity	SLA	Description
High	4 business hours	Identity/data integrity issues where the application cannot safely proceed without resolution
Medium	24 hours	Issues resolvable with customer clarification or internal verification, not urgent enough to block same-day
Low	24 hours (often auto resolvable)	Minor data-quality issues, frequently resolved by the system itself without human intervention
